

An urgent message from the Johnsville Public Utility District (JPUD)

**Please be advised that the JPUD will be starting the Water
Tank Replacement on Monday, July 8th, 2024**

Due to the nature of the storage tank replacement, this long awaited project will cut our water storage/supply in half for the remainder of the summer. Because we are a very small district this will have an immediate and severe impact on the availability of water in Johnsville. We strongly request that all residents cut any and all normal water use **at least** by 50 percent. It is recommended that outside irrigation (watering) be limited to 5 minutes per day, either in the early morning or late evening. All irrigation systems must be on a timer-please no unattended sprinklers or hoses. Preferably, we would like you to keep any landscape alive, without over-watering. Over-watering could put our entire water system at risk!

During construction we will be operating off of ONE tank. If this tank is depleted, water in the town will shut down and any occupancy will be curtailed due to an emergency action. In addition, running out of water in our remaining tank could damage our pumps, treatment and distribution system, causing financial liability to all residents/customers.

The JPUD will be relying on cooperation from all residents to get us through this process. Additional and updated information is available on our website <https://www.johnsvillepud.org/the-home-front> or by contacting the General Manager, Melissa Sheets (530) 251-7114 mdsheets346@gmail.com or any JPUD Board member directly, David Piepho, Chairman (925) 699-9575 DavidPiepho@gmail.com John LaTourette, Director (775) 843-6159 jalatour@shoglobal.net Don Fregulia, Director (775)-233-8891 donbfreguliaf@gmail.com
